

Recovery Rides

A service provided to those in recovery who need rides to recovery related activities. Destinations include treatment, mutual support meetings, Treatment Court and other services. Volunteers on the Mountain Top give one ride per month to Hudson, Catskill or other nearby destinations.

Working with other agencies such as Greener Pathways, MCC is creating a robust transportation network for people often isolated by geography and need.

Communication through a dedicated phone system, and a well-organized and active list of committed volunteers, this MCC committee is beginning to fill a much-needed void in transportation services in rural our communities.

We are seeking volunteers to join us, with a commitment of offering one ride per month.
