

# **Mountain Top Cares Coalition Local Resource Guide**

**A Resource of Community Services and Assistance  
for Members of the Mountaintop Communities**

Dear Friends and Neighbors,

If you've picked up this guide, you are already part of the solution to the growing crisis of addiction, poverty and isolation in our rural community.

We hope you'll find this guide to be a roadmap...a convenient tool...a useful compilation of all the agencies and services that are available to people who are seeking help in their journey to recovery. If this is not you, and you know of someone who might benefit from this, we hope you'll pass it on.

At this moment, you'll just see words on a page. But I ask you to look at this amazing booklet for what it truly is -- a living, breathing document. Behind every listed agency, health care provider, first responder and volunteer are people who have dedicated their lives to the service of others -- each one is passionate about relieving suffering, giving folks a second chance, healing families and providing a future for our children.

Please use this guide to point you in the right direction. And then, we hope that you will reach out and connect with those that are here to help. This is a guide for those of us on the mountaintop -- specific to our needs and mindful of the challenges that all rural communities face as we try to access services -- for ourselves and for those we love.

Mountain Top Cares Coalition, along with Wellness RX in Tannerville, is committed to the idea of removing barriers to health and wellbeing by treating the whole person with respect and compassion. We hope that this guide will be a pathway, connecting us to critical services as we build a community based on trust and support.

This is our vision of Neighbor Helping Neighbor!

## USING HOLISTIC TECHNIQUES FOR SUBSTANCE ABUSE

---

**Holistic techniques are widely known for their calming and balancing properties, which can support addiction treatment in several ways:**

- **Physical symptoms of addiction and withdrawal**
- **Emotional imbalance that can lead to substance abuse**
- **A lack of spiritual grounding**
- **Unhealthy eating habits, resulting in neurochemical imbalance**
- **Environmental toxins or contaminants**

**In addition, the use of these treatments can help people feel more at ease, more productive in their treatment response, and generally better able to cope with the challenges of detox and rehab.**

## SIGNS AND SYMPTOMS

### General warning signs include:

- Sudden change in friends
- Change or loss of interest in activities or hobbies
- Drop in work performance
- Avoiding family or family
- Stealing

### Physical warning signs include:

- Loss or increase in appetite
- Inability to sleep or unusual laziness
- The smell of substance on breath or clothes
- Nausea, vomiting, sweating, shaking of hands, feet or head
- Red, watery eyes; pupils larger or smaller than usual; blank stare
- Thick tongue, slurred speech

### Symptoms include:

- Often taking more of the substance for a longer period than intended
- Ongoing desire or unsuccessful efforts to reduce use
- Great deal of time spent to obtain, use or recover from substance
- Craving the substance
- Continued use despite ongoing social or relationship problems
- Repeated use in physically dangerous situations
- Continued use despite ongoing physical or mental health problems caused or worsened by use
- Developing tolerance or experiencing withdrawal.

## HOW DO BEHAVIORAL THERAPIES TREAT DRUG ADDICTION?

### **CONTINGENCY**

**MANAGEMENT:** Uses positive reinforcement such as providing rewards or privileges for remaining drug-free, for attending and participating in counseling sessions, or for taking treatment medications as prescribed.

### **MOTIVATIONAL**

**ENHANCEMENT THERAPY:** Uses strategies to make the most of people's readiness to change their behavior and enter treatment.

**FAMILY THERAPY:** Helps people with drug use problems, as well as their families, address influences on drug use patterns and improve overall

### **TWELVE STEP**

**FACILITATION:** An individual therapy typically delivered in 12 weekly sessions to prepare people to become engaged in 12-step mutual support programs. 12-step programs, like Alcoholic Anonymous, are not medical treatments, but provide social and complementary support to those treatments. TSF follows the 12-step themes of acceptance, surrender, and active involvement in recovery.

## **Medication Assisted Treatment:**

**Cairo Family Care Center (Vivitrol) 518-622-8525**

### What Medications and Devices Help Treat Drug Addiction?

- **Treating Withdrawal:** When first stopping use individuals may experience physical and emotional symptoms that can be reduced through the assistance of medication. This can make it easier to stop drug use.
- **Staying in Treatment:** Some treatment medications are used to help the brain adapt gradually to the absence of the drug by preventing cravings and calming the body systems. This allows individuals to focus on drug treatment therapies.
- **Preventing Relapse:** The most common triggers for relapse are stress cues such as people, places, things, and moods as well as contact with drugs. Through therapies individuals can develop a way to address these triggers and stay in recovery.
